Hands-on Software Technology Engineering Leader with over 20 years of experience

Dir. Eng / Principal Software Engineer (100% hands-on)

2023-Current

Auditmate

New York, NY

- Fully automated core business data flows to service 600 client accounts without headcount increase.
- High agency solo technical owner / developer for all invoice OCR automations including integration, data engineering, schema development, ingestion and webscraping.
- Leveraged AI to learn Salesforce and replace expensive consulting teams with 50% reduction in COGS.
- Tech: GCP, Airflow, Python, Playwright, DocumentAI, Salesforce, Postgresql, DBT, SQL

Director Of Engineering (50% hands-on)

2021 - 2023

Parallel Learning

New York, NY

- Owned technical vision, delivery and KPIs for Telehealth, Automation, Data, EHR, Integrations and other unique IP. Tech went on to win World Economic Forum awards.
- Built and hired tech stack/team from zero. Served all operations for clients, providers and careops, enabling the healthtech startup to grow from seed to Series A 5M ARR
- Led all product engineering and QA processes. Worked with Ops team for COGS reductions.
- Collaborated with ops teams with no-code and feature flag solutions for lean solution delivery.
- Tech: Google Cloud Platform, Javascript, Typescript, Python, Github, Asana

Director Of Engineering

2020 - 2021

Stadium Goods / Farfetch

New York, NY

- Headed Mobile B2C and Supplier app squads as Engineering Manager. Retained MVP employees. Helped develop OKRs to drive meaningful business impact.
- Managed recruiting, staffing and development for ~50 person engineering org.
- Mentored and coached devs to help them push past technology hurdles, build leadership skills and story refinement approaches.
- Tech: Ruby on Rails, React, Typescript, Docker, GitLab, AWS, JIRA

Head of Engineering and DevOps

2016 - 2019

True Office Learning Inc. / NYSE Governance Services

New York, NY

- Rallied multiple distributed teams to deliver the company's first ever SaaS product. Resulted in company acquisition. Learned the power of a common goal.
- Owned technical product vision, DevOps and R&D
- Jumped in and solved the hard technical issues around product and devops
- Tech: Node.JS, Python, MySQL, Docker, GitLab, Ansible, Angular, Drupal, Rackspace, SQL

Technical Architect, Manager

2013-2016

Moxie Group / Cabela's

- Enabled our remote team to build Cabelas.com mobile site and redesigned the checkout process on-time. Owned key technical decisions.
- Leveraged agile and distributed scrum to fit multiple engineering processes across geographically and politically distributed environments. Led a 5-person engineering team that delivered constant value into a high-traffic ecommerce site (500k req/day)
- Tech: Java, TomcatEE, JBOSS, HTML, JavaScript, Linux, Oracle, SQL
